Summary

Ai-native product builder crafting software that feels intuitive and ship fast. With a background in design and front-end development, I take products from zero to live in weeks for design, code, AI, and deployment in one workflow. One person, no middle layers: You talk to the person who design and ship your product, and every shipped week counts.

Experience

Product & Web Designer/Developer

Jan 2023 - Present

Self-Employee • Remote

- Design and build production websites end to end in Framer for startups, agencies, and consultancies custom design, responsive build, CMS, animation, and SEO. No templates, shipped fast.
- Design and build AI products, dashboards, and internal tools from idea to production, owning both the experience and the system underneath.
- Take ideas to working products in weeks hypothesis → design → live build as a one person team.
- Recent build: [Mana Island Smartwear](#), [thomushunziker.ai](#), [ECS Group](#), [GLX Digital](#), [Sita Studio](#), [Victoriā Uluwatu](#)

UX/UI Design Director

Oct 2022 - Jul 2026

Artonest Technosys • Remote • Surat

- Led a UI/UX design team across client apps and web app projects discovery and user flows through to final UI and Delivery.
- Built and led the team, setting direction and quality standards.
- Owned client relationships end to end and drove on-time delivery of complex app and dashboard work.

Product Designer

Jan 2024 - Mar 2025

The Significant Otter • Remote • Mumbai

- Designed applications and web apps end to end for a remote product team: delivered clean, usable UX across web and mobile and shipped featured cross functionally.

Senior Product Designer

Sep 2021 - Sep 2022

DUI/UX Infotech • On-Site • Surat

- Led UI design and UX research for mobile apps, websites and dashboards: translated research into clear interfaces and partnered with developers to ship as intended.
